KEY FINDINGS

- STRENGTH** Maintenance documentation and daily inspection compliance exceed industry benchmarks. NAARSO-certified inspectors on staff.
- STRENGTH** Operator rotation protocols consistently logged via electronic check-in. Low single-position fatigue risk.
- WATCH** Hurricane Harbor lifeguard-to-guest ratio at 1:28 during peak hours (industry standard: 1:25). Recommend staffing review.
- WATCH** Three corrective action records open > 30 days on flat ride attractions. Closure timeline recommended.

RIDE SCORE PILLAR BREAKDOWN

R	Readiness	84		Staff training currency, certification status, rotation compliance, pre-open inspection completion rate
I	Integrity	79		Maintenance record completeness, corrective action closure rate, equipment age vs. inspection frequency
D	Delivery	82		Throughput consistency, dispatch interval regularity, guest complaint frequency, operational uptime
E	Environment	78		Queue condition, signage compliance, ADA accessibility, cleanliness audit scores, emergency egress

SPLASH SCORE PILLAR BREAKDOWN

S	Safety	74		Emergency action plan currency, AED placement, chemical storage compliance
P	Protocol	70		Dispatch procedures, capacity enforcement, height/weight screening
L	Lifeguard	68		Guard-to-guest ratio, certification currency, in-service drill frequency
A	Aquatic	76		Water chemistry logs, filtration system maintenance, slide inspection
S	Structure	73		Deck condition, drain cover compliance, fencing and barrier integrity
H	Hazard	71		Lightning protocol adherence, weather closure procedures, slip/trip and fall

RISK NARRATIVE

METHODOLOGY: Scores derived from public inspection records, operator questionnaire responses, on-site assessment data, and third-party validation sources. Pillar weights and stream composition are proprietary to Amusement Standards LLC. This assessment does not constitute an engineering inspection or guarantee of safety.
