Six Flags Great Adventure

Jackson, NJ 08527 | Policy: MASI-2024-0847 | Renewal: October 15, 2026
Classification: Tier 1 Major Theme Park | 42 rides | 3.2M annual attendance

EXECUTIVE SUMMARY

Six Flags Great Adventure scores GOOD (71) with a positive 90-day trajectory (+2). The facility ranks in the 62nd percentile among Tier 1 peers. The Integrity pillar (68) is the weakest component, driven by checklist speed anomalies flagged by the AuditScore behavioral compliance engine.

MAI claims data shows a 67% decline in claims frequency (3 to 1) from 2024 to 2025, with total incurred cost decreasing 80% (\$142K to \$28.5K). Zero claims YTD in 2026. The positive claims trajectory correlates with the RIDE Score improvement from 65 to 71 over the same period.

INSURER DATA OVERLAY

MASI INTERNAL | NDA PROTECTED | ENCRYPTED AT REST (AES-256)

This section contains MASI-provided data under mutual NDA (executed Feb 12, 2026). Data is tenant-isolated and inaccessible to facility operators. Access restricted to: Tom Jones, Noah R., Drew Tewksbury. Encryption: AES-256 at rest, TLS 1.3 in transit.

MASI CLAIMS HISTORY

4 claims (3yr) | \$170,500 total incurred | Trend: Declining

CLAIMS (3YR)		TOTAL INCURRED		TREND
4		\$170,500		Declining
YEAR	CLAIMS	TOTAL INCURRED	DESCRIPTION	
2024	3 claims	\$142,000	Slip/fall (\$62K), ride evac injury (\$55K), queue i	
2025	1 claim	\$28,500	Guest injury at ride exit (resolved)	
2026 YTD	0 claims	\$0	No claims filed	

MASI LOSS CONTROL VISITS

2 visits (12mo) | 3/4 findings resolved

VISITS (12MO)	FINDINGS RESOLVED	NEXT SCHEDULED
2	3/4	Apr 2026

- Jan 15, 2026 | Inspector: Noah R. | 4 findings | 3 resolved, 1 pending
Pending: Emergency lighting replacement in Dark Knight queue area — parts on order
- Sep 22, 2025 | Inspector: Tom Jones | 6 findings | 6 resolved
All items addressed within 45 days. Facility cooperative and responsive.

CLAIMS CORRELATION ANALYSIS

Claims frequency declined 67% (3 claims to 1) from 2024 to 2025, coinciding with AS 360 deployment and RIDE Score improvement from 65 to 71. Total incurred cost decreased 80% (\$142K to \$28.5K). Zero claims YTD 2026. While correlation does not establish causation, the trajectory aligns with improved operational discipline across inspection completion (+12%), CACR (+8%), and rotation compliance (+15%) over the same period. Recommend continued monitoring investment.

ACTIVE RISK FLAGS

3 flags | Facility risk posture: MODERATE

MEDIUM	Operator checklist speed anomaly detected: Operators T. Morrison and K. Blake completing daily ride inspections in avg 38 seconds. Peer average for same checklist: 4.1 minutes. Pattern consistent across 14 operating days.	Mar 24, 2026 OPEN Source: AuditScore Engine
LOW	CACR below 90% target for 8 consecutive days. 3 CARs aging beyond 5-day SLA. Maintenance response time trending up since Feb 28.	Mar 20, 2026 MONITORING Source: CAR Tracker
LOW	Near-miss reporting rate (7.7/month) is below Tier 1 peer average (12.3/month). Suggests under-reporting rather than low incident rate given facility size.	Mar 1, 2026 MONITORING Source: NMR Analytics

AUDIT AMENDMENT TRAIL (Q1)

IMMUTABLE RECORDS | Geo-fenced | Device-bound | Supervisor-approved

Original records sealed. Amendments create linked corrections. All requests require supervisor approval within 4 hours.		
AMR-2026-0204	Feb 12 J. Martinez Mine-Cart Madness Item 3: Hydraulic pressure	
FAIL → PASS	APPROVED	GEO OK DEV OK PHOTO OK
Pressure at 2,800 PSI (in spec). Operator tapped FAIL during rapid entry.		
AMR-2026-0189	Jan 28 D. Rivera El Toro Item 7: Cable inspection	
PASS → FAIL	APPROVED	GEO OK DEV OK PHOTO !
Missed worn cable. Corrected same day. Maintenance dispatched.		
AMR-2026-0176	Jan 15 T. Morrison Nitro Item 2: Brake pad depth	
FAIL → PASS	DENIED	GEO OK DEV OK PHOTO OK
Supervisor confirmed original FAIL correct. Pad at 2mm (min 3mm).		

UNDERWRITING RECOMMENDATION

RECOMMENDATION: RENEW AT CURRENT TERMS WITH ENHANCED MONITORING
Facility scores GOOD (71) with positive trajectory and declining claims history. Three action items:
1. Require facility to address checklist speed anomaly flags within 30 days. If anomaly persists, consider premium surcharge of 5-8% on next renewal to reflect elevated integrity risk. 2. Monitor CACR trend. If below 80% at next quarterly review, require corrective action plan. 3. Schedule loss control visit for April 2026 to verify pending LC finding (emergency lighting).
Overall risk posture: MODERATE. Claims trajectory: POSITIVE. Renewal recommendation: APPROVE.
